

... Reduce Collisions and Related Losses by 23%-72%

Major Insurance and Private-Company Studies Show that Collisions Go Down With DriverCheck

Call us for details on these studies of the DriverCheck program.

Driver Behavior and Attitude Make the Difference

According to the U.S. Department of Transportation, "Ninety percent of all accidents are caused by driver actions, which are expressions of their behavior, attitude, and personal choices."

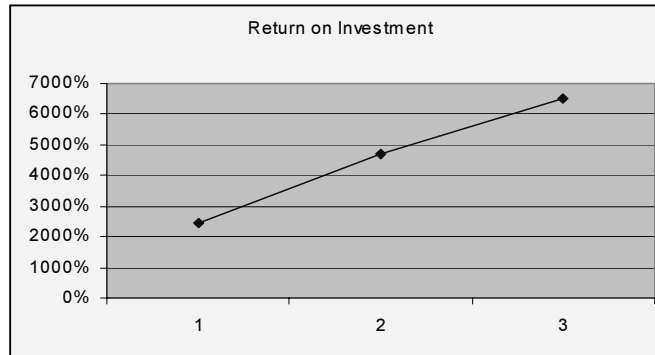

Years of DriverCheck Statistics Show

Eighty percent of a company's drivers never receive a complaint. Ten percent receive only one complaint. The remaining 10 percent receive 70 percent of all complaints.

DriverCheck helps you identify, counsel, and retrain drivers who are most likely to have serious collisions—endangering lives and costing your company money.

... Save Money for Your Company

When collisions are reduced, your return on investment with DriverCheck accelerates rapidly

You Can Easily Estimate Your Return on Investment

Go to www.drivercheck.net. Select "Our Services", then "ROI Calculation". Follow the user-friendly instructions. See how much your company can save by making DriverCheck part of your safety program.

DriverCheck Works or It's Free

DriverCheck knows that its program will work for you, and we offer you this guarantee: If you don't experience at least a 10 percent reduction in collision frequency the first year on the DriverCheck program, your service is free!

... Save Jobs

Your Drivers are Your Biggest Asset

Correcting behavior that is unsafe not only saves money for the company, it saves jobs. Our guides and on-line training modules (all included with the program) help to counsel drivers in a professional and positive manner. DriverCheck provides training in English and in Spanish.

Here's How DriverCheck Works to Increase Safety and Profitability

Unique Identification

A unique number—in large, highly legible type on a three-color decal—identifies each vehicle as part of the DriverCheck program.

DriverCheck is Always There

DriverCheck takes calls from motorists 24-hours per day, 365-days per year.

Your Success is Our Goal

Our guides for managers and drivers and our on-line training help to counsel your drivers in a professional and positive manner.

Immediate Notification

DriverCheck provides companies with immediate notification of Observation Reports—automatically, electronically, by email and/or fax. Most callers provide their names and phone numbers, allowing managers to contact them directly, if desired.

DriverCheck records its calls, and WAVE files of Observation Reports can be sent upon request.

Counseling Drivers Shows You Care

The driver's supervisor reviews the Observation Report, counsels the driver using materials provided by DriverCheck and the National Safety Council, notes any action taken to improve safety, then returns the Observation Report to DriverCheck.

National Safety Council Collision Cost Estimates

The National Safety Council estimates that the economic costs related to a collision-related death to be \$970,000, and the average cost for a non-fatal disabling injury at \$35,300. Even collisions involving only minor injuries and property damage cost an average of \$6,400.

The National Safety Council is DriverCheck's partner in safety. DriverCheck is the only driver-monitoring service approved and promoted by the National Safety Council.

At www.drivercheck.net, your drivers can . . .

Use our on-line training in English or in Spanish to increase safety awareness and driving skills
Take safety surveys (tests) to measure their understanding of each topic
